CO1-AT1
COURSE CODE: ITA0329

QUESTION NO: 11

REGNO: 192311096
NAME: K Muni Kuladeep

Networking Concepts: Mobility, Handoff & Roaming

Mobility
- Definition: Device changes physical location
- Impact: Device stays connected while moving
- Prerequisite for Handoff & Roaming

Handoff
- Definition: Seamless transfer between access points (APs)
- Purpose: Maintain connection within same network/service area
- Key Feature: Minimizes disruption

Roaming
- Definition: Using network services outside home network
- Mechanism: Agreement between service providers
- Key Feature: Extends coverage beyond home area

Key Determination: Uninterrupted Communication
- Handoff is most crucial
- Implies seamless service

Justification
- Seamless transition within a service area
- Prevents dropped calls/sessions
- Ensures continuous data flow
- Mobility enables movement, Roaming extends reach, but Handoff guarantees continuity during movement

Interdependencies Summary
- Mobility enables device movement.
- Handoff ensures continuity during movement.
- Roaming extends service beyond home network.
- All contribute to user experience.
